PROFESSIONAL PROFILE

Mining Engineer with an international M.Sc. and experience in both open-pit and underground mining operations. Strong background in day-to-day operations, mine planning, production coordination, team leadership, drilling and blasting and health and safety. Experienced in improving production workflows, coordinating people and equipment and delivering safe and efficient mining activities.

PROFESSIONAL EXPERIENCE

Quarry Operations Supervisor

Emm. N. Christodoulakis S.A. | Vachos Quarry, Interbeton S.A. | February 2026 - Present | Crete, Greece

- Leading the ramp-up of a new limestone quarry operation, establishing practical operating processes, site controls and daily workflows.
- Supervising drilling and blasting, loading, hauling and production activities to support safe, efficient and reliable operations.
- Coordinating personnel, heavy mobile equipment and contractors; resolving operational and equipment-related challenges.
- Implementing safety measures, equipment inspections, traffic coordination and continuous improvements in quarry operations.

Mine Planning Engineer

Hellas Gold S.A. | July 2024 - February 2026 | Olympias, Chalkidiki, Greece

- Developed short-term mine plans and contributed to forecasts, annual budgets and medium-term planning for underground operations.
- Performed monthly plan-versus-actual reconciliations and updated mining and backfill sequences to reflect operational constraints.
- Designed and reviewed underground infrastructure and mining layouts; collaborated across technical services and operations.
- Contributed to digital mine planning initiatives, including Deswik MDM implementation and battery-electric equipment studies.

Mining Engineer

Karakyrios Ath. & Co. | December 2023 - July 2024 | Drymos, Greece

- Supervised two TITAN Group quarries (Drymos and Lagyna), covering H&S, drilling and blasting, production planning, personnel coordination and regulatory compliance.

Mining Engineer / M.Sc. Thesis Researcher

Boliden AB | February 2023 - September 2023 | Sweden

- Developed a deep underground mine design and examined layout criteria for autonomous, battery-electric mining fleets.

Mining Engineer / Diploma Thesis Researcher

StoneGroup International | May 2019 - June 2019 | Drama, Greece

- Participated in an EU-funded marble quarry research project focused on oriented core drilling and discontinuity analysis.

Engineering Intern

Public Power Corporation | July 2018 - August 2018 | Heraklion, Greece

- Conducted basic analyses of fuels and deionized water and observed production optimization activities.

EDUCATION

M.Sc. European Mining Course | Delft University of Technology | 2021 - 2023

CGPA: 8.0/10.0 | Thesis: Design criteria for an autonomous, electric mine; simulation of battery-electric equipment and mine layout.

M.Eng. Mineral Resources Engineering | Technical University of Crete | 2013 - 2020

CGPA: 7.0/10.0 | Diploma thesis: Dolomitic marble deposit discontinuities using oriented core drilling (10/10).

TECHNICAL SKILLS

Mine planning and design: Deswik, AutoCAD, Rocscience Dips / UnWedge

Programming and analysis: Python, MATLAB, Excel, Power BI

Operations: Drill & blast, H&S, mobile equipment coordination, production planning, reconciliation

CERTIFICATIONS & AFFILIATIONS

ATEX Explosion Protection (TÜV HELLAS) | Safety & Use of Explosives in Quarries (TÜV NORD) | Deswik Essentials | MATLAB Programming

Technical Chamber of Greece | Greek Association of Mineral Resources Engineers | Federation of European Mineral Programs
